Member of Chinese Academy of Engineering, Professor of Zhejiang University of Technology

Speech Topic

Biotechnological production of vitamins

◀ **CHEN Jian**

Member of Chinese Academy of Engineering, Professor of Jiangnan University

Speech Topic

Biomufacturing of food ingredients and additives- New quality productive force cultivated by cutting-edge technology

The Food Academician Forums are a high-end academic platform actively created by China Food Additives and Ingredients Association with spirit of "High standards, Full public welfare, Gathering consensus, Promoting innovation", aiming at integrating scientific and technological innovation resources, leading the development of strategic emerging industries and future industries, and accelerating the formation of new quality productivity. Zhang Chonghe, chairman of the China National Light Industry Council, delivered the opening speech for the forum, and he hoped that academicians would lead the food industry science and technology workers to make food additives better serve the future food, so that food is safer, more nutritious and more delicious. The forums attracted hundreds of well-known experts and scholars in the industry to gather together, following the academicians to focus on the world's scientific and technological frontier, and jointly explored the scientific research and innovation achievements and development trends affecting the future process of the food industry.

Forum on Chinese and Foreign Regulations and Standards

◀ ZHANG Jianbo
 Director of Standard Office 3 of China National Center for Food Safety Risk Assessment

Speech Topic
 Food safety standard system for food additives in China

◀ SEGURO KATSUYA
 Managing Director of Japan Food Additives Association

Speech Topic
 Regulations on food additives in Japan

◀ Dr. Dirk Cremer

Speech Topic
 The regulatory framework for food additives and beyond in the European Union

◀ Clinton Priestley
 Assistant Country Director International Relations Specialist FDA China Office

Speech Topic
 Understanding how the FDA regulates food additives and GRAS ingredients

With the rapid iteration of technology and changes in the international trade environment, China's food additives and ingredients industry is in an important window period to accelerate transformation & upgrading, and to enhance the international discourse power. The scientific supervision of the industry and the independent & voluntary compliance of enterprises are important guarantees for the high-quality development of the industry. The Forum on Chinese and Foreign Regulations and Standards held by FIC focused on the similarities and differences between Chinese and foreign regulations and standards, so as to connect and learn from each other. At the forum, regulatory experts from China, Japan, the European Union and the United States gave a detailed introduction to the regulatory framework and regulatory system of food additives, reached a consensus on development, and jointly discussed how to balance innovation and risk in the development of the industry, so that Chinese industry enterprises have the opportunity to deeply understand the requirements of new international regulations and standards, and constantly improve the compliance capacity of industry enterprises. The exchange of international regulations will help Chinese industry enterprises export products, better participate in international competition, and promote the further improvement of the technical level, product quality and market competitiveness of industry enterprises.

FIC 2024 Machinery & Testing Devices Pavilion

Machinery & Testing Devices Pavilion Sprung up Displaying Industrial Manufacturing Hard Strength

Food Industrial Automatic Production Equipment

Food Sterilization Packaging Machinery

Professional Equipment for Pre-made Dishes
